Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-40 and 58-69, drawn to a sample carrier, classified in class 422, subclass 102.
- II. Claims 41-57, drawn to method of transferring a specimen, classified in class 436, subclass 48.

The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the apparatus as claimed can be used to practice another and materially different process such as sample storage or incubation and does not require the method of transferring the sample as claimed in group II.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
